FOR IMMEDIATE RELEASE

GEORGE WASHINGTON UNIVERSITY TO HOLD SIX COMMENCEMENTS MAY 9

WASHINGTON, D.C. -- Six separate commencement exercises will be held on the George Washington University campus on Sunday, May 9, with approximately 2,400 degrees being conferred.

Honorary degrees will be conferred on J. Willard Marriott Jr., president and chief executive officer, Marriott Corporation and Chung Ju Yung, chairman of the Hyundai Group, a global Korean corporation, both of whom will receive the Doctor of Public Service. William H. Gass, novelist, essayist and literary critic, will receive the Doctor of Humane Letters.

George Washington University President Lloyd H. Elliott will confer honorary degrees and degrees in course at all six commencements.

Marriott and Chung will be honored at the 10:30 a.m. exercises of the GW School of Government and Business Administration in the Charles E. Smith Center. Marriott will address the graduates.

Michael J. Pelczar Jr. will speak at the 12:30 p.m. ceremony of the GW Graduate School of Arts and Sciences in the Dorothy

(more)

Betts Marvin Theater. A distinguished service award will be presented to Julius Axelrod, Nobel Laureate in physiology and medicine for 1970, who received his doctorate in pharmacology from GW in 1955.

Washington law firm of Reid and Priest, will speak to graduates at the 1 p.m. commencement of the GW School of Public and International Affairs in Lisner Auditorium.

William H. Gass, who is David May Distinguished University
Professor in the Humanities at Washington University in St. Louis,
will receive his honorary degree of Doctor of Humane Letters at
the 3 p.m. exercises of the GW Columbian College of Arts and
Sciences in the Smith Center, and will address the graduates.

Dr. Alvin Nashman, president, Systems Group, Computer Science Corporation, will speak to engineering graduates at the 4 p.m. ceremony of the GW School of Engineering and Applied Science in Lisner Auditorium.

Lee Etta Powell, associate superintendent, Area III,
Montgomery County Public Schools, will speak to education
graduates at the 7 p.m. commencement of the GW School of Education
and Human Development, also in Lisner Auditorium.

Emeritus status will be conferred on four professors:

Milton C. Devolites, professor of health services administration

(at the School of Government and Business Administration ceremony);

Ralph K. Lewis, professor of anthropology (at the Columbian College of Arts and Sciences exercises) and Margaret McIntyre and Rodney

Tillman, both professors of education (at the School of Education and Human Development commencement).

FOR IMMEDIATE RELEASE

ROBERT PERRY HONORED BY GW'S BUSINESS SCHOOL

WASHINGTON, D.C. -- Robert G. Perry, special assistant to the administrator of the Office of International Cooperation and Development, Department of Agriculture, was recently made an honorary member of the national business administration honor society, Beta Gamma Sigma, at George Washington University.

Following the induction ceremony, Perry spoke on "The Challenges of Government and Business."

Perry is on leave from his job at AT&T to be special assistant in the Department of Agriculture in his capacity as a member of the President's Commission on Executive Exchange.

The goal of the commission is to provide an environment where business and government executives can share common experiences and problems and combine resources to solve them.

Perry has held line and staff positions in the sales, training, operations accounting, marketing and personnel departments at AT&T. His most recent position was market manager, in which he was involved in strategic planning.

(more)

Perry received his undergraduate degree in accounting and economics at George Washington. He is currently chairman of GW's School of Government and Business Administration Alumni Advisory Board, chairman of the school's annual fund program and on the board of the Fork Union Military Academy.

FOR IMMEDIATE RELEASE

KOREAN BUSINESS MAN RECEIVES HONORARY DEGREE AT GW

WASHINGTON, D.C. -- The man whose company produced the first completely Korean-built car, who established the largest private philanthropic institution in Korea, who by some accounts is one of the wealthiest men in the world, and who took up tennis this year at the age of 66 will receive the honorary Doctor of Public Service degree at George Washington University commencement ceremonies Sunday, May 9.

Chung Ju Yung, chairman of the Hyundai business group, 76th among world-wide firms outside the U.S., according to a 1981 Fortune survey, will receive the degree at School of Government and Business Administration ceremonies at the Smith Center, corner of G and 22nd Streets, N.W., 10:30 a.m.

Newsweek magazine honored Chung as a man who "personifies the raw energy and determination of a remarkable new breed of first-generation entrepreneurs who have made the nation's (Korea) economic 'miracle' a reality."

Though Korea was steeped in semi-feudal and agrarian concepts in 1947 when Chung established the Hyundai Construction Company, the country has grown and its economy prospered under his influence. Hyundai building

projects are worldwide and include every type of construction from dams and tunnels to industrial and nuclear power plants. Hyundai built the Jubail oil terminal port complex in Saudi Arabia, its largest project to date. In 1967, Chung established the Hyundai Motor Company. The company's line of cars has reduced Korea's importation of foreign cars and includes the first completely Korean-built car, the Pony, which has been successful in the Middle East, South America, Southern Europe and even Japan. In 1971, Chung established Hyundai's shipbuilding plant. Korea has since emerged second only to Japan as the largest shipbuilding country.

Chung is founder of the Asan Foundation, giving half his holdings in the Hyundai Construction Company to establish the largest private philanthropic institution in Korea. The foundation helps the under-privileged through free medical services in remote rural areas and grants funds to social welfare organizations and scholars for research.

Now serving his third term as chairman of the Federation of Korean Industries, Chung was chairman of the Korean-African Association in 1978 and chairman of the Korean-Arab Friendship Society in 1976. His public service includes a term as vice-chairman of the Korean Atomic Commission and director of the Korea Chamber of Commerce and Industry. He also served as co-chairman of the Korean-British Economic Promotion Committee.

Among his honors are many presidential awards for industrial and economic achievement from the Republic of Korea, the Order of Merit from the Republic of Senegal and the Badge of an honorary commander of the Most Excellent Order of the British Empire.

FOR IMMEDIATE RELEASE

GW NATIONAL LAW CENTER BUILDING FUND RECEIVES GIFT FROM JOSEPH B. DANZANSKY COMMEMORATION COMMITTEE

WASHINGTON, D.C. -- George Washington University's National Law Center (NLC) building fund has received a \$100,000 memorial gift from the Joseph B. Danzansky Commemoration Committee and the Danzansky family. This gift comes to the NLC during the campaign to raise funds for the \$16.7 million expansion of the Jacob Burns Law Library, the complete renovation of Stockton Hall, and the construction of a new classroom building and moot courtroom. An amphitheater classroom in the new building will be dedicated as a memorial to the late Joseph B. Danzansky, Washington-area business and civic leader and lifelong supporter of GW, who died in Washington in 1979.

Danzansky, a graduate of GW's Columbian College of Arts and Sciences (B.A. '35) and law school (J.D. '36), had a special enthusiasm for GW. A cheerleader for university athletic events, he eventually became a member of GW's Board of Trustees in 1972.

(more)

He received GW's Alumni Achievement Award in 1969. As president of Giant Food Inc., he presided over that company's pioneering consumer innovations and community outreach programs. Danzansky later became chairman of the board of Giant and served an unprecedented two terms as president of the Metropolitan Washington Board of Trade and two terms as general campaign chairman of the United Way of the National Capital Area. He rose to prominence for his role in caring for the victims of the 1968 riots, and during the decade that followed, played a critical role in efforts to knit the community back together again. He is perhaps best remembered, however, for his efforts to bring baseball back to Washington.

In recognition of the gift, the university will hold a luncheon on Friday, May 14, at noon in the GW University Club, third floor, Marvin Center, 21st and H streets, N.W. Members of the Danzansky family, the Joseph B. Danzansky Commemoration Committee, Washington-area business and community leaders, GW officials and NLC faculty will be present to honor the man who was fond of saying, "All my life, I've had a love affair with the law."

"The Joseph B. Danzansky Amphitheater-Classroom, made possible by the Danzansky family and friends," said NLC Dean Jerome Barron, "will be a living memorial to the vitality and spirit of the late Joseph B. Danzansky."

FOR IMMEDIATE RELEASE

INFORMATION CENTER ON TELECOMMUNICATIONS ESTABLISHED AT GW

WASHINGTON, D.C. -- A Telecommunications Information Center, designed as a telecommunications reference material repository for government, industry and the academic community, has been established at George Washington University.

The information center, co-sponsored by GW's Center for Telecommunications Studies (CTS) and the university's Gelman Library, will house information on policy, research and management aspects of telecommunications as well as conference papers, dissertations and theses, government agency policy and planning documents, and research papers from government and industry. It will act in cooperation with existing corporate and government telecommunications libraries, according to CTS director Dr. Christopher H. Sterling.

"We expect the center to become a national repository for telecommunications materials in the face of declining government facilities in this area," Sterling said. "It will provide students and professionals working in all areas of telecommunications with services and references not previously available."

GW Experts on the News

ISSUE: Edward Kennedy positioning himself for campaign '84

EXPERT: Stephen J. Wayne, professor of political science and public affairs, author of Road to the White House and lecturer, specializes in presidential election campaigns and public policy making.

"Edward Kennedy's identification with the nuclear freeze movement is just one area where the Massachusetts senator is positioning himself for the presidential election campaign of 1984. At the same time, he is orienting himself to traditional Democratic issues such as social security and employment, cultivating a statesmanlike image in the Senate, toning down his once strident oratory and even co-sponsoring criminal code legislation with conservative South Carolina Senator Strom Thurmond in order to appear as a compromiser, a Senate leader. A third image he is projecting is that of the 'good daddy,' thereby deemphasizing his break-up with Joan."

Contact Wayne at 676-6294.

ISSUE: Middle class flight from the cities is politically destabilizing

EXPERT: Jeffrey R. Henig, assistant professor of political science, focuses his studies on housing displacement and neighborhood organization and is publishing a monograph on the Adams-Morgan neighborhood of Washington, D.C.

"Recent statistics show that middle class flight from the suburbs continued unabated in the 1970s. This trend will probably continue in the 1980s, bringing more economic polarization between the wealthy and the poor and creating the potential for political conflict as the differences between homeowners and renters sharpen."

Contact Henig at 676-7582 or 593-8791.

(over)

ISSUE: Washington, D.C. prostitute sentenced to longest term in 40 years

EXPERT: Gerald Caplan, professor of law, recently completed a study of teenage prostitution and sexual exploitation of children with a Ford Foundation grant.

"There has not been popular enforcement of a move to punish men who look for the services of a prostitute, making the history of such enforcement a double standard. Many laws are written to make the person soliciting guilty, but you could make an argument either way for who is soliciting. The common morality is that it's the woman who is to blame. That's becoming increasingly understood as discriminatory."

Contact Caplan at 676-7390.

ISSUE: Work ought to be self-fulfilling

EXPERT: James Mosel, professor of psychology and director of GW's industrial/ organizational psychology training program, is an expert on job burnout.

"The idea that work ought to be self-fulfilling is a popular myth promoted by our culture. It leads to premature job dissatisfaction and disappointment. Seldom will work satisfy an individual's higher needs. Work is what it has always been--work."

Contact Mosel at 676-6322

ISSUE: How can a boss deliver fulfilling work?

EXPERT: David Brown, professor of management, has written and lectured on why subordinates don't do what they are asked to do--and why they do, the fifth freedom: freedom from supervision, leadership and follower-ship and other topics concerning boss/employee relations.

"The manager should establish achievable goals for him or herself and subordinates which parallel organizational goals. They should be goals in which both the planning and the doing can be shared with those who will inevitably be involved with them. The manager should lose no opportunity to talk about them, to provide their rationale, to see that progress is being made towards them, and to support and reinforce those who make contributions to them."

Contact Brown at 676-6619.

THE HONORABLE WILLZAM E. COLBY, former CIA director, partner in D.C. law firm Reid&Priest COMMENCEMENT SPEAKER at the GW SCHOOL OF PUBLIC AND INTERNATIONAL AFFAIRS MAY 9, 1982

It's an honor to come here tod ay. I also spent a good deal of my life in public service. I'm afraid it was a little bit too public in the later years. Today what you all are interested in is not what it was like 40 years ago. You are interested in what it looks like today. As you look out to your reunion, your 20th will be in 2002 and your 40th in 2022. You have to confess there are a couple of alternative worlds, a world better which continues progress that has been made in the standard of living not only of the affluent United States but also of other countries of the world, standards of education, of health, of the incredible increases in communications. You have to factor in all the intangibles. WE will see, or can see a spread of ideology, of human dignity, of human rights. We are now trying to drive to a point where all people can have a role in this. We are beginning to reach to the backwaters where poverty and ignorance are reduced and health needs are met. If we can make progress in the next 40 years in this direction, you can look back with satisfaction at your 40th reunion.

There is another possible world with possible danger of new kinds of weapons, new techniques for control of people. In recent history, the tape recorder was used to overthrow at least the Shah. With the accelleration of events, we no longer have the luxury of much time to think because the secretary has to be on the noon news conference. As he jumps from one of his problems to another, we become dazzled with the complexity of the problems. We sit here 30 minutes away from a Soviet nuclear missile. The Soviets face the same threat. We face the potential of change in many of our basic disciplines that can come from biology and electronics among others. In this situation, there can be a difference. It's going to be in the field of intelligence, in all the aspects of bringing your mind's power to work on these problems. You'll benefit from instant communications systems. Your're going to be advantaged in the second process, that of analysis.

THE HONORABLE WILLIAM E. COLBY, GW, School of Fublic and International Affairs, May 9, 1982

You're going to have an additional challenge, that of the ability to communicate.

We see that the president cannot change things without the consent and cooperation of Congress. There will need to be a larger intellectual discipline aimed at enabling us to integrate them (data) into a sensible theory to move to solve problems.

There are still going to be risks, the risk of being in another war, the risk of economic failure, the risk of not getting ajob. When you compare risks, you can be led to a course of action, look at risks, then work on those problems and think of ways to protect yourselves. If we adopt this feeling, we're still outward going to have risks. The initiative of turning inward to solve problems can involve a final risk. The final risk can be our isolation and annihilation. That is the risk of facing inwardly, of thinking only of ourselves.

There is another way of facing risks. We must think where our nation ought to go in trying to overcome the problems of backwardness, of attitudes of hostility.

If you look at these risks, you have to say those are of a different nature. We have to weigh the risks that face us over the next 20 or 40 years. You must use your intelligence in all the senses of that word so that you can contribute to meeting these risks.

There is another commencement speaker today. President Reagan is discussing a new idea for increasing further arms reduction (at Eureka College in Illinois). We can all welcome our government's taking a forward step toward further control of arms. It is exactly that kind of thinking outward, it's that attitude of mind that I think has been imparted to you at George Washington. I hope that you will come back in 20 or 40 years and feel that you have helped solve some of these problems. I will certainly be attentive toward any steps that you take that are helping toward that better scenario.

J. Willard Marriott, Jr.

President and Chief Executive Officer, Marriott Corporation

Speaking to graduates at George Washington University's

School of Government and Business Administration commencement

May 9, 1982

(Marriott also received the honorary degree of Doctor of Public Service at the commencement)

Despite the state of the world's economy, and the economy of our nation, it is my opinion that there is more opportunity for success in the 1980s than ever before. There are more open doors awaiting those who have the determiniation and self reliance, and who have prepared to move forward than we've ever known. There are new products to be discovered, new services to be performed that are unknown today. Human wants are never satisfied. The demand for fruitful ideas is insatiable. Dependability is always at a premium.

Michael J. Pelczar, Jr.

President of the Council of Graduate Schools in the U.S.

Speaking to graduates at George Washington University's

Graduate School of Arts and Sciences commencement

May 9, 1982

...support for education...has become one of the major issues of President
Reagan's administration. Federal support for higher education programs has
been long-term and bipartisan. This long-time commitment is being challenged by
the Reagan Administration. Obviously, the assumptions that have governed federal

policy toward post-secondary education in the post-war years are under a searching examinaition by policy makers. The present administration seems determined to reduce the federal presence in all areas of domestic policy as a matter of philosophy and economics. This represents a reversal of a quarter century of federal initiatives, not for educational objectives, but as an unintended consequence of an untested economic theory that is being advanced through the political process. Once again, higher education is forced to adjust and react to changes whose objectives lie outside of it. The quantity and quality of the nation's human capital is thus being threatened at the very time more knowledge is needed.

William H. Gass, Novelist, essayist and literary critic

David May Distinguished University Professor in Humanities at Washington University in Lt. Louis

Speaking to graduates at George Washington University's

Columbian College of Arts and Sciences

May 9, 1982

(Gass also received the honorary degree of Doctor of Humane Letters at the commencement.)

So this reading will be like living, then; the living each of you will be off in a moment to be busy with; not always speedily, I hope, or in the continuous anxiety of consequence, the sullenness of inattention, the annoying static of distraction. But it will be only a semblance of living - this living - nevertheless, the way unspoken reading is a semblance, unless, from time to time, you perform the outer world within; because only in that manner can it deliver itself to us. As Rainer Maria Rilke once commanded: dance the taste of the fruit you have been tasting. Dance the orange. I should like to multiply that charge, even past all possibility. Speak the street to yourself sometimes, hear the horns in the forest, read the breeze aloud, and make that inner wind yours, because, whether Nature, Man, or God has given us the text, we independently possess the ability to read, to read really well, and to move our own mind freely in tune to the moving world.

Alvin Nashman, president, Systems Group, Computer Science Corp.

Speaking to graduates at George Washington University's

School of Engineering and Applied Science

May 9, 1982

No CONQUEROR

HAS EVER CHANGED THE WAY PEOPLE LIVED AND WORKED AS MUCH AS THE STEAM ENGINE, NO PREACHER HAS EVER DISSUADED MEN FROM WAR. IT IS THE ANONYMOUS TECHNICIAN, ENGINEER AND SCIENTIST WORKING QUIETLY AT HIS BENCH OR DESK, WHO HAS HAD MORE REAL IMPACT THAN ALL OTHERS TO HUMANIZE SOCIETY.

HOMO TECHNOLOGICUS MUST NOW ASSUME RESPONSIBILITY FOR MANAGING THIS ENTIRE PLANET.

SIMPLY PUT - AS TECHNOLOGY CONTINUES TO EXERT AN EVER MORE DETERMINANT ROLE, THEN THOSE WHO GENERATE AND UNDERSTAND IT MUST BECOME MORE INVOLVED IN THE MAKING OF THE CONCOMITANT DECISIONS AND POLICIES.

TECHNOLOGY IS THE GATEWAY TO THE FUTURE, AND WE HAVE THE MEANS TO MAKE THAT FUTURE BETTER OR NON-EXISTENT.

Excerpts from commencement address by Lee Etta Powell, associate superintendent Area III, Montgomery County Public Schools, to George Washington University School of Education and Human Development:

In spite of declining enrollments, fiscal problems, and other problems, education continues to be one of the most talked-about enterprises in our communities. And this enterprise, this profession is no stronger than its weakest member. Regardless of your post-graduate plans this is the time to examine what you believe--what you bring to your profession.

We are the products of what we believe. Beliefs are determined by our depth of knowledge at any given time--they're not static--and they can't be separated from our behavior.

When I began teaching years ago, I believed that IQ was the sole measure of intelligence. It is refreshing to know now that intelligence is not fixed, that it can be raised.

I began with a nationalistic philosophy of education. My goal was to help produce literate citizens who could make rational democratic choices.

FOR IMMEDIATE RELEASE

TWO NEW MEMBERS JOIN GEORGE WASHINGTON UNIVERSITY BOARD OF TRUSTEES

WASHINGTON, D.C. -- At its meeting May 20 George Washington University's Board of Trustees elected two new members. Both designated alumni trustees, they will serve for three-year terms, effective July 1.

Gregory W. Huber is the first student-nominated alumni trustee, selected from among alumni submitted by the GW Student Association to the General Alumni Association. The procedure, which is in effect for a three-year experimental period, increases the number of trustees chosen by the alumni group from two to three.

Huber received the Bachelor of Business Administration degree in accounting from GW in 1981 when he received the Accounting Department Award for the highest grade point average in accounting. A member of Beta Alpha Psi professional accounting organization, and Beta Gamma Sigma professional business organization, he also is a member of the Ohio Society of CPAs. He was active in the GW Student Association during his years at GW, serving as vice president for financial affairs during 1980 and '81. He was a member of the University Budget Committee, a member of the Joint Committee of Faculty and Students, and director of the Student Advocate Service. He served as chairperson of the GW

Awards Selection Committee. In 1981 he was the recipient of the Outstanding Student Award from the Association of Government Accountants. Since graduation from GW, Huber has been associated with Alexander Grant & Co. as staff accountant in the Washington office.

Howard P. Hoffman is director and vice chairman of Security Pacific
Financial Services Division and director and managing director of Security
Pacific Financial Services International Limited. In 1963 he founded
Howard P. Hoffman Associates Inc., a consulting firm providing real
estate asset management services to over 250 major corporations and
financial institutions, and directed the firm in assisting clients in site
location and acquisition, land planning and development, facility disposition,
real estate financing, rezoning negotiations, leasing and other real estate
transactions. In 1977 the firm became a subsidiary of Lehman Brothers
Kuhn Loeb Inc., the New York based investment banking firm. In 1981,
Security Pacific Financial Services Division acquired the company and it
continues to provide real estate advisory services to corporations under the
name Realty Advisors, Security Pacific Financial Services Division.

Hoffman is a founder of the Albert Einstein College of Medicine and is a member of the Board of Overseers, the college's lay governing body. He attended George Washington University on a basketball scholarship and graduated with a B.A. degree in government in 1950. Hoffman and his firm have been profiled in major professional and trade journals including <u>Business Week</u>, <u>The Wall Street Journal</u>, <u>Harvard Business Review</u> and <u>Building Magazine</u>.

GW DIMOCK GALLERY JUNE-JULY EXHIBITION

WHAT: MASTER PHOTOGRAPHS FROM WASHINGTON COLLECTIONS

PHOTOGRAPHS FROM APPROXIMATELY 1900 to 1960

WHEN: THURSDAY, JUNE 3, THROUGH FRIDAY, JULY 30

10 A.M. TO 5 P.M. MONDAY THROUGH FRIDAY

WHERE: DIMOCK GALLERY, GEORGE WASHINGTON UNIVERSITY

OFF THE LOWER LOUNGE OF LISNER AUDITORIUM,

21ST AND H STREETS, N.W.

WASHINGTON, D.C. -- Master works of photography borrowed from local area collectors will make up the summer photography show at the Dimock Gallery, Art Department, George Washington University. The works chosen include representative samples of "vintage" photography, beginning with the work of the photo-secession movement and ending with portraits circa 1960. Silver, platinum, gum bichromate and carbro prints as well as photogravures will be represented.

Among the photographers whose work will be exhibited are Abbott, Hine, Bodine, Evans, Coburn, Brandt, Kertesz, Adams, White, Weston, Sander, Mantz and Cartier-Bresson.

The Dimock Gallery, off the lower lounge of Lisner Auditorium, 21st and H Streets, N.W., is open to the public from 10 a.m. to 5 p.m. weekdays. The Foggy Botton/GWU Metro stop is a short distance from the gallery.

GW Experts on the News

ISSUE: Falklands crisis destabilizing international banking system

EXPERT: Fariborz K. Ghadar, D.B.A., associate professor of business administration, specializes in the international economy and lectures on international banking.

"More important--and more disturbing--than the short-term effects of the Falklands crisis on the international economy is the effect of government interference in the world banking system, underscored by the British freeze on Argentine assets held in London banks. This continues a trend begun during the Iranian/American crisis, a new phenomenon where political pressures are brought to bear on the world banking system, decreasing Eurodollar liquidity and jeopardizing free market transactions such as grain sales."

Contact Ghadar at 676-5981 or 527-3511.

ISSUE: Plans to prosecute draft registration resisters called undermining

EXPERT: Thomas F. Courtless, Ph.D., professor of law and sociology, is an expert in juvenile justice, crime and punishment, and prisons as they relate to society.

"I am not impressed with the Reagan administration's plans to selectively prosecute draft registration resisters—nor am I surprised. Selective prosecution of any group has never shown long-term results. The administration's plan will make the current draft registration system appear even more illegitimate than it now does to many and can only undermine its credibility. What's more, it will only contribute to the reputation for meanness so far earned by this administration."

Contact Courtless at 676-7465 or 585-2592.

ISSUE: French socialism a year later: capitalism as usual

EXPERT: Harvey Feigenbaum, Ph.D., assistant professor of political science, is a political economist specializing in France. He lectures on the nationalization of French industry and has just completed a book, The Politics of Public Enterprise: Oil in the French State.

"A year after Francois Mitterrand became French president, we can see that French socialism is capitalism as usual. The changes have been moderate and nationalization of key industries such as oil hasn't made a difference in how those industries are run. The French socialists, after all, nationalize industry and then tell it to go ahead and make a profit. The effect is more symbolic than anything else and in the long term may pressure industry to preserve jobs.

Contact Feigenbaum at 676-6565 or 328-1040.

ISSUE: Shifting education programs to states will hurt students

EXPERT: Eugene Kelly Jr., Dean of the School of Education and Human Development and professor of education, is an author and speaker on national educational issues.

"The proposed additional cuts in federal funds for education are terribly shortsighted. It is a bit of magical thinking to maintain that shifting important programs with reduced funding to the states and localities will not hurt students. It is outrageous to have national programs that develop a monstrous arsenal of weapons and at the same time neglect human development. The cuts in federal funds for education are nothing less than the federal government's abandonment of its legitimate responsibilities."

WEST HARTFORD RESIDENT WINS TWO ENGINEERING

AWARDS AT GW

WASHINGTON, D.C. -- Graduating senior civil engineering major Joseph Fischetti, a resident of S. Main Street, West Hartford, received two awards during the recent commencement of the George Washington University School of Engineering and Applied Science. Fischetti won the Martin Mahler Prize in Materials Testing, given to the upper division or graduate student in engineering who submits the best reports on tests in the materials laboratories course with preference given to pre-stressed concrete tests. This awared carries with it a one-year membership in the American Society for Testing Materials.

Fischetti also tied for second place in the civil engineering senior design award competition for his "Analysis, Design and Cost Estimate of an Offshore Loading and Unloading Facility for an AOE-1 Tanker." This Competition seeks to encourage students to conceive, design and construct for testing an imaginative project in hardware or software. Winners are chosen on the basis of originality, calculation accuracy, hardware craftsmanship, depth of theory and oral presentation.

WEST HARTFORD RESIDENT WINS TWO ENGINEERING

AWARDS AT GW

WASHINGTON, D.C. -- Graduating senior civil engineering major Joseph Fischetti, a resident of S. Main Street, West Hartford, received two awards during the recent commencement of the George Washington University School of Engineering and Applied Science. Fischetti won the Martin Mahler Prize in Materials Testing, given to the upper division or graduate student in engineering who submits the best reports on tests in the materials laboratories course with preference given to pre-stressed concrete tests. This awared carries with it a one-year membership in the American Society for Testing Materials.

Fischetti also tied for second place in the civil engineering senior design award competition for his "Analysis, Design and Cost Estimate of an Offshore Loading and Unloading Facility for an AOE-1 Tanker." This Competition seeks to encourage students to conceive, design and construct for testing an imaginative project in hardware or software. Winners are chosen on the basis of originality, calculation accuracy, hardware craftsmanship, depth of theory and oral presentation.

FOR IMMEDIATE RELEASE

GW MARVIN CENTER THIRD FLOOR GALLERY

SELECTED WORKS OF WANG MING

WHO: WANG MING

WHAT: CALLIGRAPHY, POETRY AND PAINTING

WHEN: TUESDAY, JUNE 8, THROUGH FRIDAY, JULY 30

MONDAY THROUGH SATURDAY, 7 A.M. TO MIDNIGHT,

SUNDAY, 9 A.M. TO MIDNIGHT

WHERE: THIRD FLOOR GALLERY

GEORGE WASHINGTON UNIVERSITY MARVIN CENTER 800-21st STREET, N.W., WASHINGTON, D.C.

WASHINGTON, D.C. -- Selected works of Washington artist Wang Ming will be on exhibition in the Third Floor Gallery of George Washington University's Marvin Center from Tuesday, June 8, through Friday, July 30. Titled "Inspiration of the Brush: Calligraphy, Poetry and Painting," the 24 works of art shown will include albums, scrolls and paintings.

Wang Ming was born in Peking in 1921. While in Taiwan, he studied art with Prince Pu-yu and Y.I. Sun, two artists whose work is in the classical style. Ming's work has been shown extensively in Washington. Locations have included the International Monetary Fund buildings, the Franz Bader Gallery and the Corcoran Gallery of Art. The Brooklyn Museum in New York has also exhibited his work. He is currently teaching calligraphy at George Washington through the Department of East Asian Languages and Literatures.

The exhibition is sponsored by the Governing Board, Marvin Center; Dimock Gallery, Art Department; and the Department of East Asian Languages and Literatures, all of George Washington University.

The Marvin Center Third Floor Gallery is open without charge.

MONTGOMERY COUNTY ASSOCIATE SUPERINTENDENT OF SCHOOLS

SPEAKS AT GW COMMENCEMENT

WASHINGTON, D.C.-- Lee Etta Powell, associate superintendent of Area III Montgomery County public schools, spoke to graduates of the School of Education and Human Development at George Washington University's recent commencement ceremonies.

"In spite of declining enrollments, fiscal problems and other problems," Powell said, "education continues to be one of the most talked about enterprises in our community. And this enterprise, this profession is no stronger than its weakest member. Regardless of your post-graduate plans, this is the time to examine what you believe—what you bring to your profession.

"We are the products of what we believe. Beliefs are determined by our depth of knowledge at any given time. They're not static and they can't be separated from our behavior.

"When I began teaching years ago, I believed that IQ was the sole measure of intelligence. It is refreshing to know now that intelligence is not fixed, that it can be raised.

(more)

"I began with a nationalistic philosophy of education. My goal was to help produce literate citizens who could make rational democratic choices."

Powell is pictured with School of Education and Human Development Dean Eugene Kelly (right) and GW President Lloyd Elliott (left).
